50X1-HUM

The Militia arrested many officials and workers to find out who the saboteurs were and to uncover those responsible for storing the whole shipment of Soviet cotton at the "Runo" Textile Mill.

HUNGARIAN WORKERS SABOTAGE PLANTS

50X1-HUM

Recent reports from Hungary tell of further acts of sabotage committed by discontented industrial workers. They set fire to and destroyed the Nagyteteny Central Warehouse for oil and fats, a fuel depot of the Fanto Enterprise, at Budapest, and the repair shop of the Matyasfold airport. Two huge explosions at Diosgyor distroyed an industrial plant called the "Africa," which produced artillery ammunition. Up to the present, 30 fires and explosions have been recorded.

The entire police force, the Communist brigades, and firemen are constantly on the alert. Hundreds of workers have been arrested.
